

REMARKS

Applicants appreciate the allowance of claims 1-3, 5-12, 14-19, 22 and 26-30.

By the foregoing Amendment, previously rejected claims 20 and 21 are cancelled and claim 4 has been amended. Support for molecular weight expressed as "g/mol" in the amendment of claim 4 is found in the specification, as filed, for example, in Example 1 on page 7 and support for 500 g/mol is found in original claim 4.

Regarding "molecular weight," the Examiner's comments are noted, but the Examiner is referred to 21 C.F.R. Part 175, subparts B and C (e.g., 21 C.F.R. § 175.105) where molecular weight for substances such as polyalkylene glycols and derivatives thereof are given as molecular weight, without any specification. Thus, the Examiner's understanding based on his professor's teachings are not shared by the government in its federal regulations.

Additionally, claims 23, 24 and 25 are amended to delete the objectionable term "such as."

The application should now be in condition for immediate allowance, which action is earnestly solicited.

If any fee is necessary to make this paper timely and/or complete, such fees may be deducted from Deposit Account No. 19-4375.

Respectfully submitted,

Thomas P. Pavelko

# TITLE 21--FOOD AND DRUGS

## CHAPTER I--FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES (CONTINUED)

### PART 175--INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS--Table of Contents

#### Subpart B--Substances for Use Only as Components of Adhesives

#### Sec. 175.105 Adhesives.

(a) Adhesives may be safely used as components of articles intended for use in packaging, transporting, or holding food in accordance with the following prescribed conditions:

(1) The adhesive is prepared from one or more of the optional substances named in paragraph (c) of this section, subject to any prescribed limitations.

(2) The adhesive is either separated from the food by a functional barrier or used subject to the following additional limitations:

(i) In dry foods. The quantity of adhesive that contacts packaged dry food shall not exceed the limits of good manufacturing practice.

(ii) In fatty and aqueous foods. (a) The quantity of adhesive that contacts packaged fatty and aqueous foods shall not exceed the trace amount at seams and at the edge exposure between packaging laminates that may occur within the limits of good manufacturing practice.

(b) Under normal conditions of use the packaging seams or laminates will remain firmly bonded without visible separation.

(b) To assure safe usage of adhesives, the label of the finished adhesive container shall bear the statement "food-packaging adhesive".

(c) Subject to any limitation prescribed in this section and in any other regulation promulgated under section 409 of the Act which prescribes safe conditions of use for substances that may be employed as constituents of adhesives, the optional substances used in the formulation of adhesives may include the following:

(1) Substances generally recognized as safe for use in food or food packaging.

(2) Substances permitted for use in adhesives by prior sanction or approval and employed under the specific conditions of use prescribed by such sanction or approval.

(3) Flavoring substances permitted for use in food by regulations in this part, provided that such flavoring substances are volatilized from the adhesives during the packaging fabrication process.

(4) Color additives approved for use in food.

(5) Substances permitted for use in adhesives by other regulations in this subchapter and substances named in this subparagraph: Provided, however, That any substance named in this paragraph and covered by a specific regulation in this subchapter, must meet any specifications in such regulation.
